

CTI is a **non-profit** committed to tackling educational inequality through 1:1 tutoring

# Coronavirus Tutoring Initiative

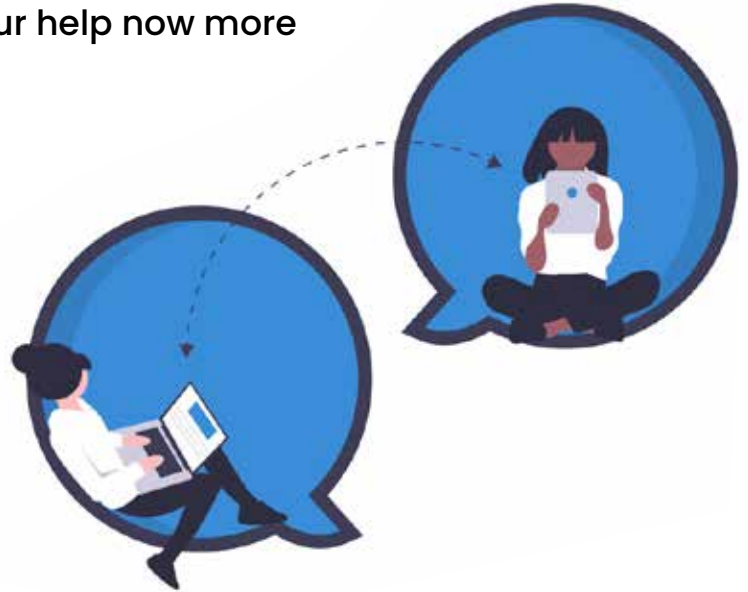

Tutor in any subject at KS3, GCSE or A-Level!

*CTI was created with the aim of helping students most affected by school closures during the pandemic.*

Whilst schools are beginning to reopen, educational inequalities still remain, and we need your help now more than ever!

Our tutoring is delivered by volunteer university students, just like you, because we believe that your recent experience puts you in the best position to help students and grow their confidence.

We provide tutoring for students at KS3, GCSE and A-Level in all subjects.

*“ It has been a pleasure to teach students that are committed, curious and with so much potential. ”*

Jude, Volunteer tutor

## Who are we?

CTI was founded by an Oxford second year undergraduate on the day that the schools' closure was announced, with the expectation that a few of his friends would help tutor local disadvantaged students.

Since then CTI has grown exponentially. We've delivered over **20,000** hours of tutoring (**the equivalent of two years in five months!**), with **3800 tutors helping over 1800 students** across the country. We now have a team of over 60 fantastic volunteers helping behind the scenes, to ensure that CTI can continue to grow.

## Do I need any experience?

None at all! Just enthusiasm and commitment to helping your students. We have a dedicated tutor support team who can help with any questions, as well as a friendly Facebook page where you can exchange tutoring tips and resources.

## What is the time commitment?

As little as 1-2 hours a week! You can sign up to tutor as many students as you want, so the time commitment is very flexible. Most of our tutors work with each student for about an hour a week, plus time for preparation between sessions. You can adjust the number of students you tutor at any time.

## Did you know?

Even before lockdown, disadvantaged students were **18 months behind** their peers by the time they took their GCSEs. The curriculum learning gap between disadvantaged pupils and their peers has widened by 46% since 2019.

Annual Report NFER

## Is all the tutoring online?

We have teamed up with Bramble, an online tutoring platform, which is where all tutoring sessions take place. Bramble allows you to watch your lessons back and upload powerpoints or write on a virtual whiteboard. You can also tutor via email if the student prefers.

## What about safeguarding?

You will have to complete some online safeguarding training before you start tutoring, and if you are a recent graduate or gap-year student going on to university, provide us with a DBS check.

*“ Feels like I really have a chance to succeed.”*

Abigail, Year 13

### What subjects can I tutor?

You can tutor your degree subject(s) and any that you feel comfortable with, such as subjects you did at A-Level or GCSE. We have subject-specific resource banks to help if you've not done them in a while.

### What about Scottish qualifications?

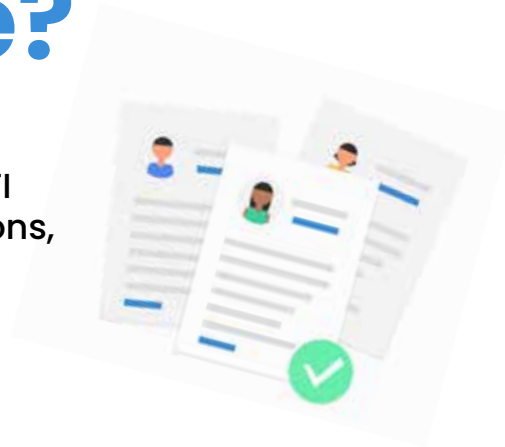

Most of our students are doing English qualifications, but if you did Scottish qualifications at school, there's an option to let us know on the sign-up form and we will try to get you matched up to a Scottish tutee!

*“ I really appreciate the fact that such talented and knowledgeable tutors from the top universities are there to help out.”*

Year 11 student

## What's in it for me?

You get to build up **invaluable skills** whilst making a genuine difference to a disadvantaged student's life. CTI opens up avenues for future teaching and tutoring options, and is a great thing to put on your CV. You also get to virtually meet **a wonderful group of supportive tutors** through our tutor Facebook group.
